

# One Tree Planted

Today is World Environment Day. And as Amneal, we make healthy possible. And we also need to make the planet healthy in order to make healthy possible. So both goals are aligned together. We have obviously a role to play in multiple areas, like providing affordable medicines and environment comes to our mind because we are very mindful that we do not damage the environment. So we just partnered with One Tree Planted organization to plant trees on behalf of every employee. So 7,200 trees will be planted in India, in US, in Ireland, and where we need to do reforestation. So that's a little bit of Amneal contributing today. Tomorrow, it will contribute more and all of us can do more. The plastic use we can avoid as much as we can. Planting trees on your own. Walking, biking to work. There are many, many things that can help the environment. So let's do our part Amnealians.
